

Infection Prevention and Control

Live on-line learning
Complementary to all apprentices

Connect2Care experts use their in-depth knowledge and skills to deliver this unique online course on dealing with infection prevention and control.

The course includes infection prevention and control measures used within healthcare settings in light of the COVID-19 outbreak.

This 3 hour course provides delegates with the knowledge to confidently follow infection prevention and control principles within the workplace, including how to keep themselves, the working environment and others safe.

Attendees will gain confidence in following and implementing their organisation's infection control procedures, to limit the risk of infection and control the spread of possible pathogens.

This online course is suitable for employees of all staff levels as it provides delegates with the solid foundations to limit, control and prevent the spread of infection in the workplace.

Course Content

- ▶ Understanding the different types of pathogens, including an overview of how they start and spread (covers the COVID-19 virus).
- ▶ How to keep yourself, colleagues and others safe from the risk of infection.
- ▶ How to be able to confidently communicate with those who use or access the service about the precautionary measures being taken to keep them safe from infection.
- ▶ How to recognise the chain of infection and how to break it, including practical workplace changes to prevent the spread of infection.
- ▶ How to safely and correctly utilise products and methods of infection limitation, control and prevention.

Duration

3 hours.

Number of Delegates

50.

Cost

£25 + VAT per delegate.
A closed cohort price can be discussed upon application.

Certification

Learners will achieve an attendance certificate at the end of this course.
